

Stupanj IP-zaštite označava se dvoznamenkastim brojem (npr. IP 65), gdje prva znamenka određuje stupanj zaštite od krutih mehaničkih tijela, prašine, odnosno od dodira osoba s opasnim dijelovima (dijelovi u vrtnji ili dijelovi pod naponom), dok druga određuje stupanj zaštite od štetnog djelovanja vode i/ili tekućine.

U slijedećoj tablici prikazani su stupnjevi i kratki opis zaštite:

1. znamenka	Zaštita od krutih tijela	2. znamenka	Zaštita od tekućine
0	Nema zaštite	0	Nema zaštite
1	 <p>Zaštita šake ili upada tijela promjera >50mm</p>	1	 <p>Zaštita od kapajuće vode</p>
2	 <p>Zaštita prsta ili upada tijela promjera >12,5mm</p>	2	 <p>Zaštita od kapajuće vode pod kutem 15</p>
3	 <p>Zaštita od upada tijela promjera >2,5mm</p>	3	 <p>Zaštita od prskanja pod kutem +/- 60</p>
4	 <p>Zaštita od upada tijela promjera >1mm</p>	4	 <p>Zaštita od prskanja iz svih smjerova</p>

5		5	
Zaštita od prašine		Zaštita od mlaza	
6		6	
Potpuna zaštita od prašine		Zaštita od jakog mlaza	
		7	
		Zaštita od privremenog uranjanja	
		8	
		Zaštita od trajnog uranjanja
